## Details:

# Competences, Digital Materials and Classroom Application

## Three meetings to share and apply teaching skills

Pearson is pleased to offer a series of three training events at Liceo Giovio, Como for teachers in the province of Como. The contents of the three meetings will be:

1. **Competences: What they mean in your classroom - 5 April 2017, 14:30-16:30**

What exactly are competences? Why do we teach for competences? How can we integrate them into lessons? How can we evaluate them?

The purpose of the seminar will be to deepen our understanding of the competences and increase our ability to include them in lessons.

2. **Pearson Digital Products: How to make the most of digital technology at school - date to be determined together**

How can we use an interactive white board in class? How can students and teachers benefit from digital content? What role do these instruments have at home? Pearson digital teaching tools are available: eTexts (ITE/LIMBook), MyEnglishLab, Didastore. We will look at Pearson materials to understand how to approach digital and build comfort with its use.

3. **Lesson Planing Workshop: Presentation and discussion of lesson plans - date to be determined together**

Teachers will present lessons they have developed to apply the competences and their knowledge of digital technology. This meeting will be an opportunity to share ideas and think about how the two can be put together and implemented in the class.
